

Mplus Workshop at M3

Title: New Features in Mplus Version 8.9 and Forthcoming 8.10

Instructors: Bengt Muthen, Tihomir Asparouhov, Ellen Hamaker

This is your chance to catch up on the latest series of Mplus analysis acronyms: AESEM, ASEM, BSEM, DSEM, ESEM, PSEM, PSEM-ELGM, RDSEM, and RSEM. These techniques offer better ways to do factor analysis, growth modeling, and SEM as well as more practical ways to study measurement invariance and structural differences across groups and time. These techniques also present novel ways to analyze intensive longitudinal data using multilevel time series analysis. Real-data applications of these techniques will be discussed.
